Instant Issuance
software

Driving Customer Satisfaction

Entrust Financial Instant Issuance software is the world's best-selling solution for permanent, immediately activated, dual interface debit and credit cards. In minutes, consumers can leave a branch or store location with a personalized card.

- Broad card management system integration
- Designed for evolving issuance needs
- Variety of personalization options

ENTRUST
SECURING A WORLD IN MOTION

Entrust Instant Issuance software

SOLUTION HIGHLIGHTS

Industry-leading offering

Entrust's end-to-end solution has continuously evolved to delight customers.

- 7,500 unique financial institutions and over 30,000 individual branches and retail locations worldwide
- Features for a variety of issuance workflows
- Integration with more than 80 card management and card authorization systems
- Fast implementation
- Dual interface encoding instead of chip encoding

KEY FEATURES & BENEFITS

Aligned to your needs

Entrust's Financial Instant Issuance software is designed to support your evolving issuance needs, whenever and wherever – whether it's for new accounts, emergency card replacement, low-volume re-issuance, or PIN services. It empowers you to compete in an instant access world where cardholders expect exceptional service and convenience.

Personalization options

Our portfolio of personalization printers gives you the flexibility to start with the cardstock of your choice and end with the type of card you want to issue. Our software is integrated with a range of DATACARD® issuance systems that can produce embossed or flat cards with magnetic stripe encoding, chip encoding, indent printing, and more.

- Issue multiple payment branded cards from one multi-input hopper system
- Use background images from a pre-set gallery, or from an approved image provided by the cardholder
- Choose among a variety of encoding solutions, including magnetic stripe, and contact and contactless smart cards
- Select personalization options, including flat printing, embossing, indenting, and full-color graphics

Leverage Issuance System Integration

Integration with a broad range of Entrust issuance systems allows for secure and affordable issuance of multiple form factors. The following systems are supported:

Embossing/Direct-to-card Printing

- DATACARD® CE870™ Instant Issuance System

Retransfer Printing

- Entrust CR825™ Instant Issuance System
- DATACARD® CR500™ Instant Issuance System

Direct-to-card Printing

- DATACARD® CD820 Instant Issuance System

Embossing

- Entrust CE875™ Instant Issuance System
- DATACARD® CE870™ Instant Issuance System
- DATACARD® CE870™ Instant Issuance System – kiosk model

Entrust Instant Issuance software

HOW IT WORKS

A complete card issuance solution

Our solution supports dual interface (EMV and contactless) compliant applications including but not limited to:

- Built-in compliance for VISA and Mastercard instant issuance security recommendations
- VISA: VSDC, payWave
- Mastercard: M/Chip, MICA, Maestro
- American Express: AEIPS
- China Union Pay: PBOC
- Discover: Diners Club International, PULSE: D-PAS
- JCB: J/Smart™
- Support for PBOC 2.0 standard
- Audited PCI compliance
- End-to-end data encryption (AES, 3DES, and SSL with certificates)
- Enclosed and locked hopper and supplies
- Printers designed to be bolted down
- Password-protected access
- Support for seven languages

Management reporting and administrative tools

Entrust's instant issuance software offers a variety of options for creating, monitoring, and reporting on card issuance activities:

- Easily monitor and track production information, statistics of card types, and volume information at the branch or central level
- Inventory summary, balancing reports, and email notifications enable secure, effective card stock management
- Set-up tools simplify creating user roles and assigning detailed system and feature privileges per role
- Activity reports improve security by auditing user and branch level activity
- Monitoring tools provide real-time device status as well as printer ribbon supply status information, allowing support staff to quickly identify and respond to reported issues

PIN Solutions

For a complete end-to-end solution, our software is integrated with a full range of PIN pads and encoders that support:

- New PIN selection
- Re-PIN
- PIN change
- PIN transfer
- Pre-PIN

Supported PIN Peripherals

- Ingenico IPP320 PIN Pad
- DATACARD® SuperC.A.T® III Encoder
- VeriFone PINpad 1000SE
